# 1. What is ThinkTrader?

ThinkTrader is ThinkMarkets' proprietary, award-winning trading platform. Available on Web, Android, and iOS, this cuttingedge platform allows traders access on up to 4,000 instruments across global markets, including forex, indices, commodities, stocks, cryptocurrencies, ETFs.

Here's a breakdown of ThinkTrader's key features:

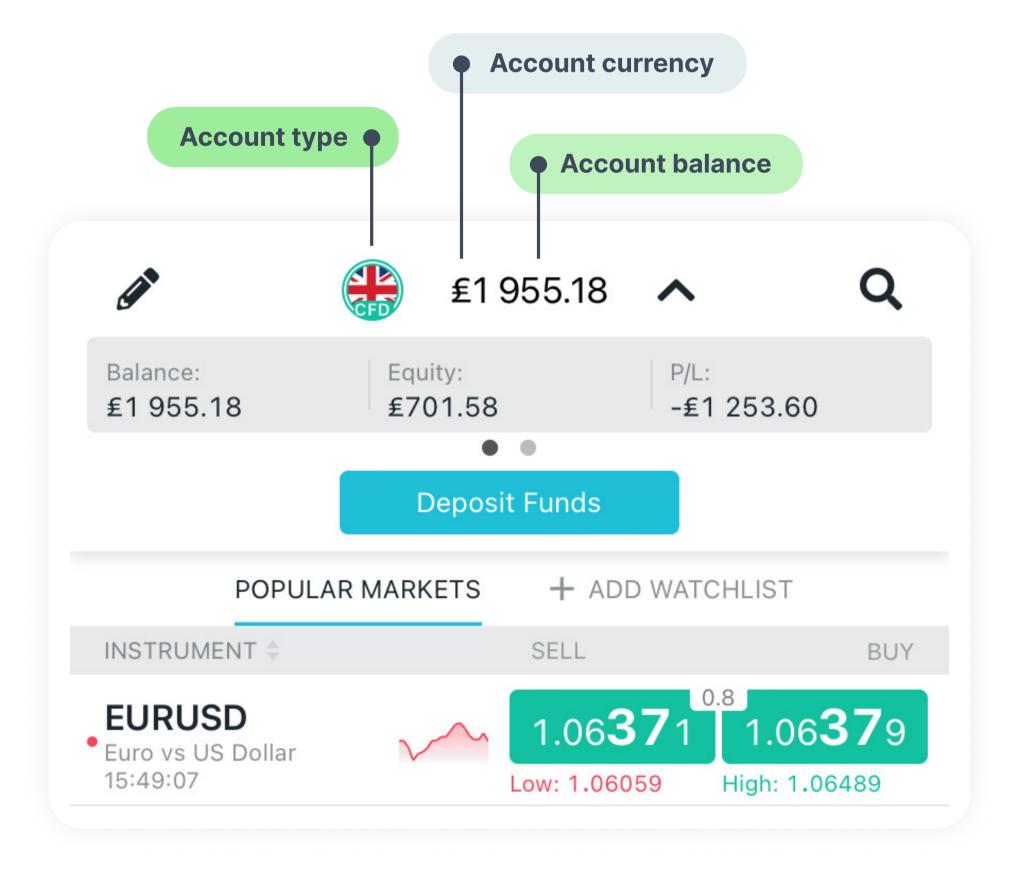

- Multi-platform access: Trade from your web browser, Android phone or iOS device.
- Wide range of instruments: Access up to 4,000 instruments across global markets.
- Global market coverage: Trade forex, indices, commodities, stocks, cryptocurrencies, ETFs.

ThinkTrader is designed with an intuitive interface for both new and experienced traders. It offers a variety of features that can help you with your trading, including:

- **Technical analysis tools:** A variety of technical analysis tools are available to aid you in identifying trading opportunities.
- **Risk management tools:** ThinkTrader offers a number of risk management tools, such as stoploss and take-profit orders, to help you manage your risk.
- News and research: Stay up-to-date on the latest market news and research with ThinkTrader's integrated news feed.
- Exclusive features: Access ThinkTrader-exclusive features such as Signal Centre, TrendRisk Scanner (mobile) and Traders' Gym (web).

# 2. Accounts

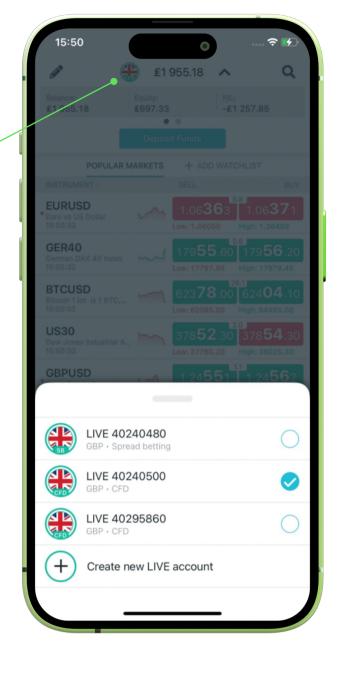

# 2.1 Account Details

# **2.2 Account Selection**

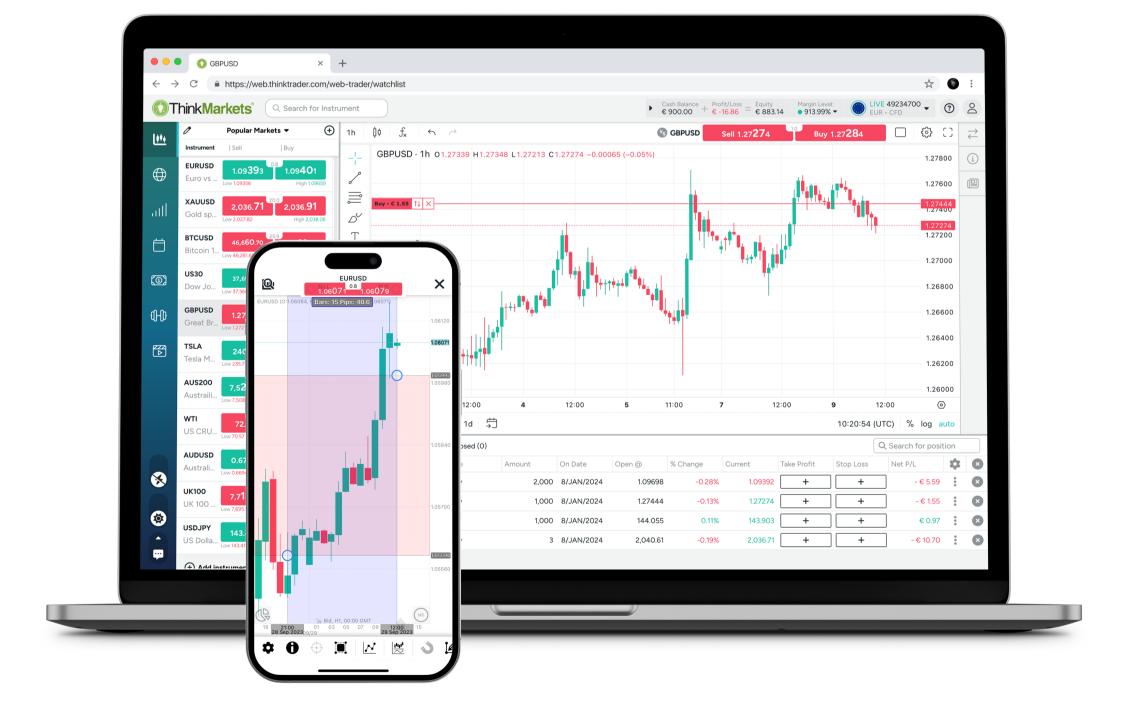

Click the flag icon to switch between **ThinkTrader** accounts

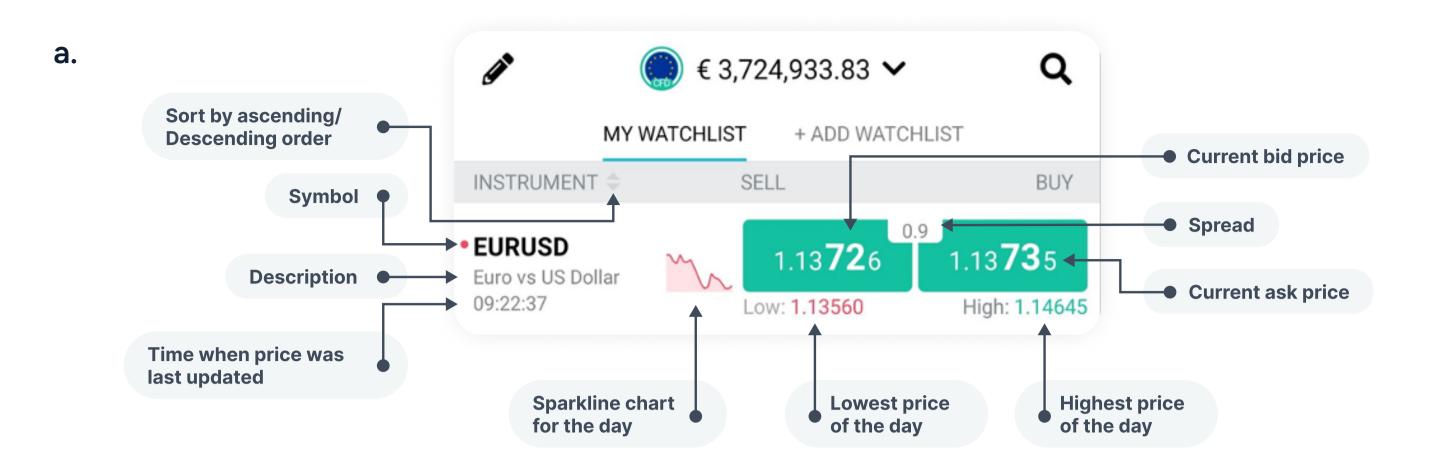

# 3. Watchlists

Track and monitor the price performance of instruments with the Watchlists tab. You can scroll through a pre-built one or customise your own. Get quick real-time updates on market movements and price changes without disrupting your workflow.

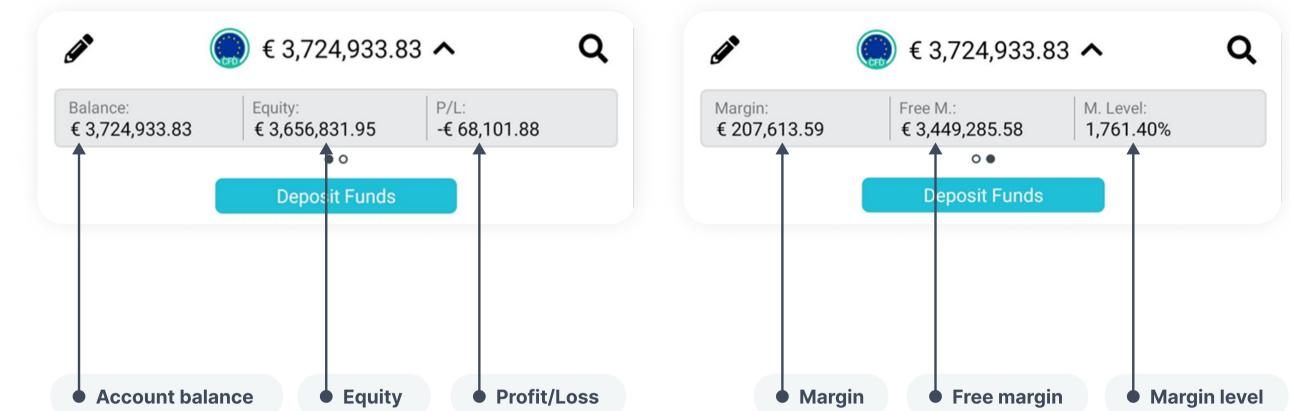

ThinkTrader Guide

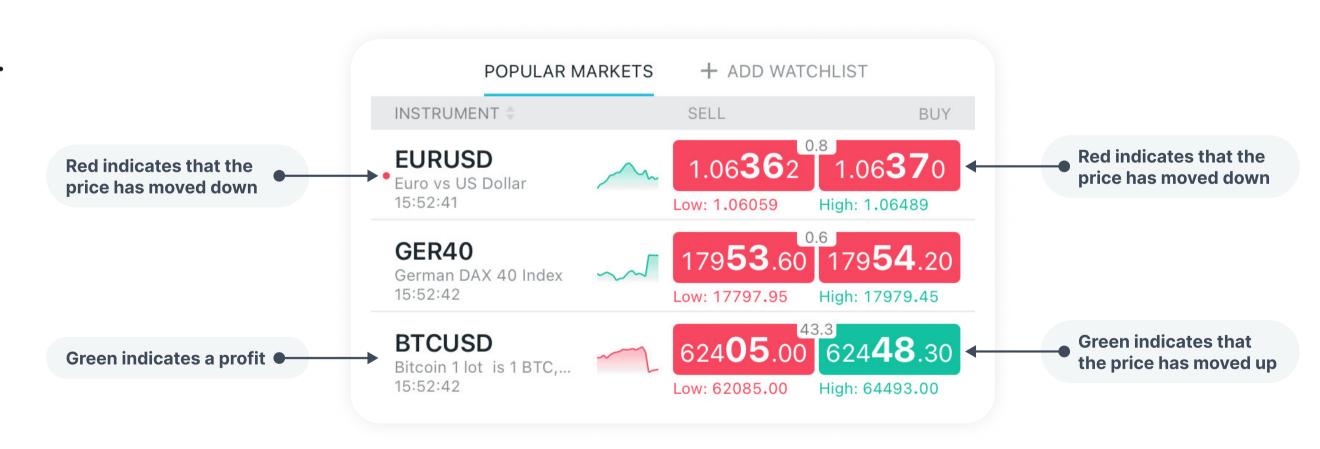

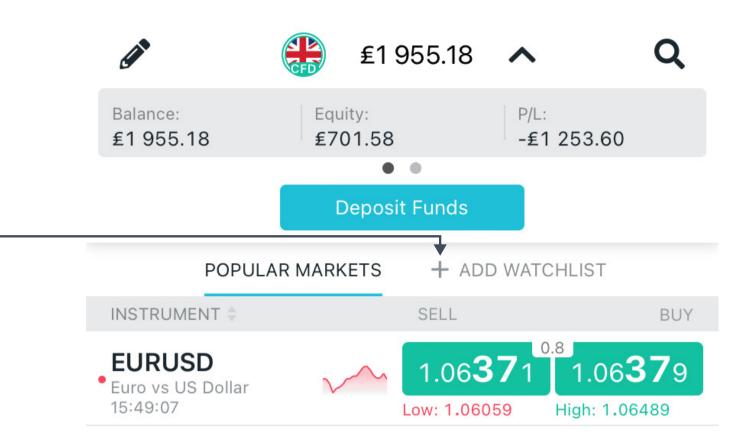

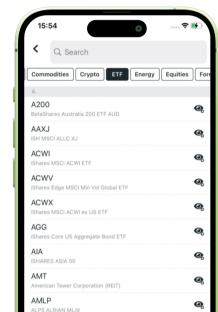

# 3.1 How to build a custom watchlist

 Click +Add Watchlist to create your custom list of instruments. You may build up to 10 watchlists.

- Search the instruments you want to monitor.
   You can filter the results by market.
- Click the 'eye' icon on the right to choose which watchlist to add the instrument to or to create a new watchlist.

#### 3.2 How to edit a watchlist

Tap the pencil icon to edit your watchlist. You can:

- Change the name of the watchlists
- Change the order in which the watchlists are displayed
- Rearrange the order of the instruments in the watchlist
- Remove instruments from the watchlist
- Move one/multiple instruments from one watchlist to another
- Delete watchlists

# 4. Charts

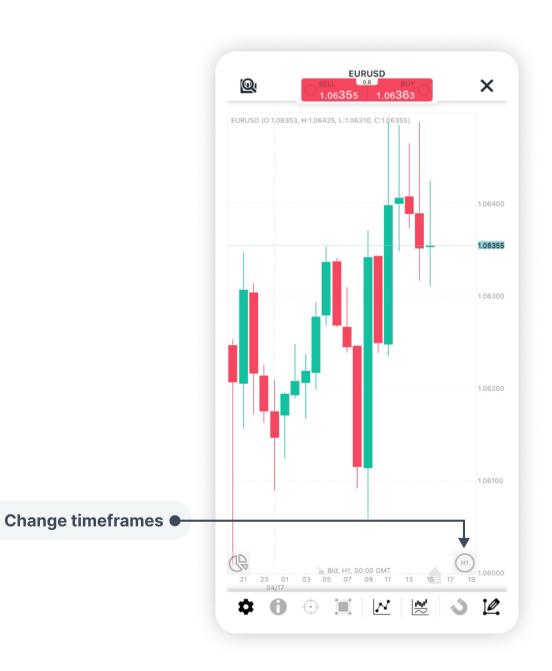

Charts visually represent price movements and market data. Depending on your trading strategy, different chart types work better for analysis and interpretation of price trends and patterns.

# 4.1 Chart Types

ThinkTrader offers a variety of chart types, including:

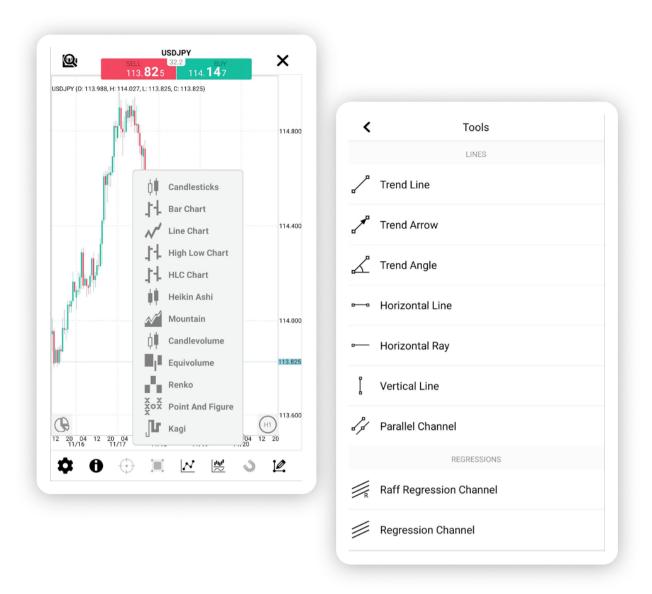

- Drawing tools
- Technical indicators
- Templates
- Number of charts on screen
- Alarms
- Themes and templates

ThinkTrader is equipped with:

- 12 chart types
- 50+ drawing tools
- 100+ technical indicators

#### 4.2 How to place a trade from the charts

- 1. Tap the Sell/Buy button on top of the chart
- 2. Set the stop loss/take profit levels by dragging the price lines on the chart or typing the price
- 3. Tap Submit

# 4.3 Setting an alarm

Double tap the chart to add an alarm based on the price or indicator

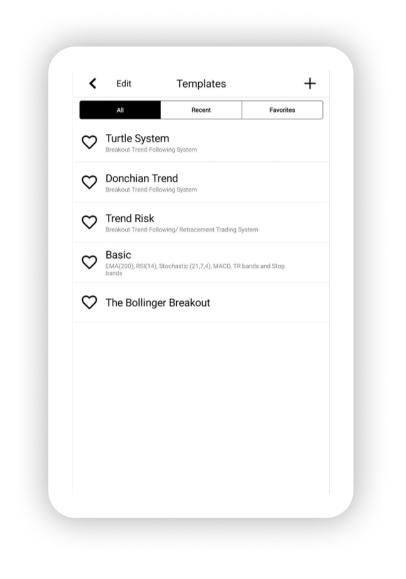

# 4.4 Multi Screen Display

Tap this button to activate the multi-screen display and see 1, 2, or 4 charts on a single screen.

#### 4.5 Templates

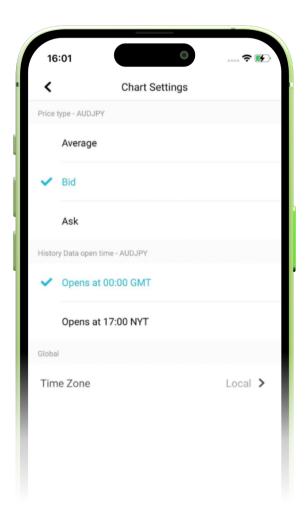

There are available templates that you can automatically insert on the charts. Or tap the + to build your own template.

# 4.6 Update Chart Settings

Customise the charts to your preference:

- If the price in the chart is built from bid, ask, or average prices
- Choose historical data open time
- Global time zone for the chart

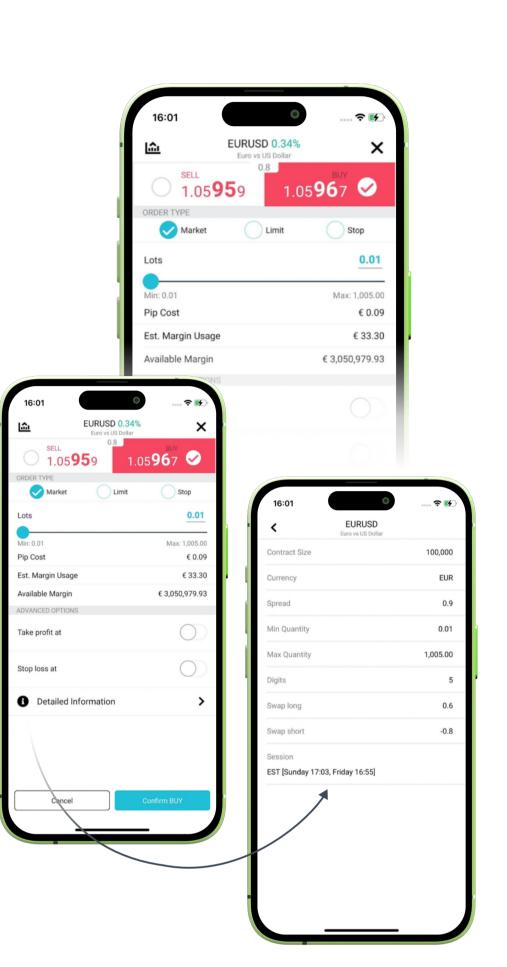

# 5. Order Window

# **5.1 Detailed Information**

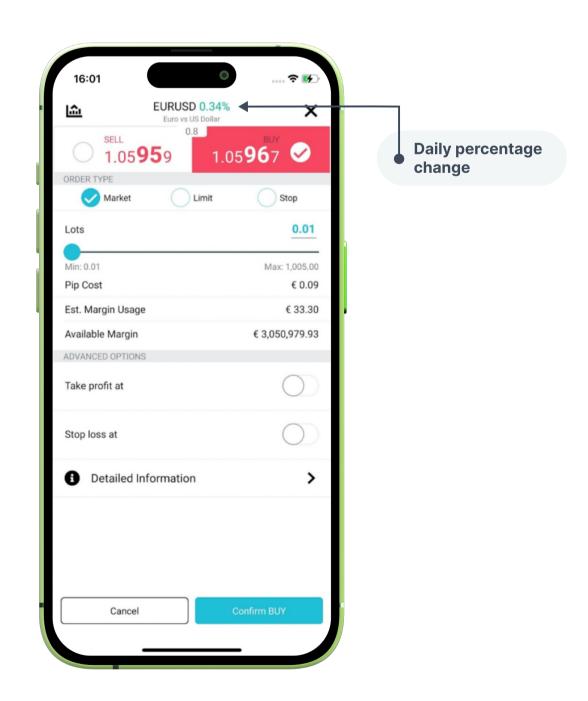

Tap Detailed Information to learn more about the instrument, such as:

- Contract size
- Currency
- Spread
- Min/max quantity
- Decimal precision
- Swap rates for long / short positions
- Instrument's active trading session

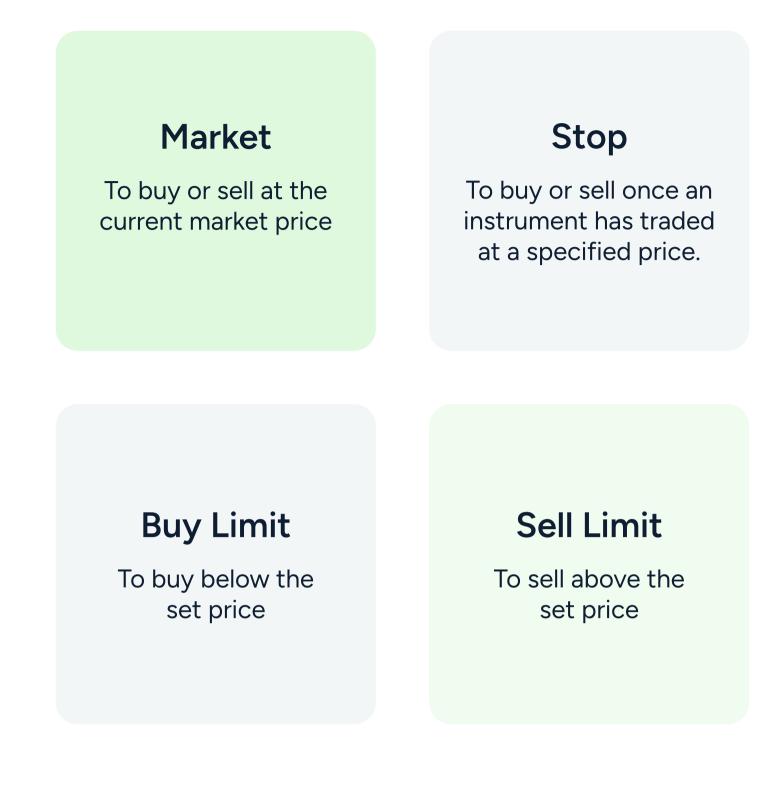

# 5.2 How to set a trade order at Market price

- 1. Click the Sell/Buy button to open the order window.
- Choose your order size (the number of lots) by typing or dragging the slider from left to right. The pip cost and estimated margin usage will automatically be calculated below along with your available margin
- 3. (Optional) Tap Take profit at and Stop loss at to set take profit and stop loss levels.
- 4. Click Confirm

# 6. Order types

6.1 How to set a Limit or Stop order

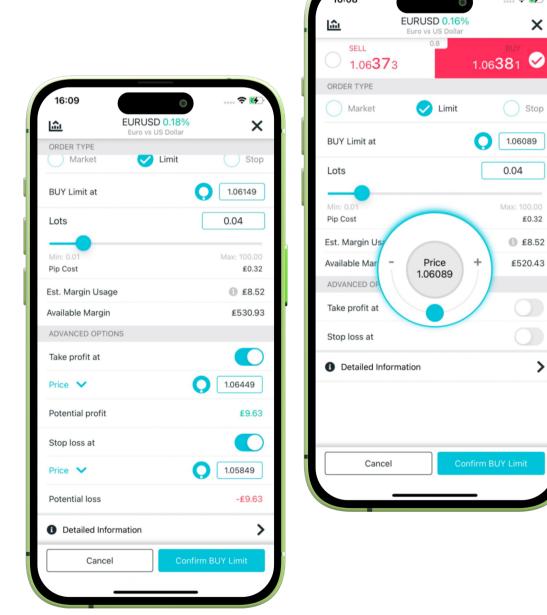

×

£0.32

>

- 1. Click the Sell/Buy button to open the order window.
- 2. Select between Limit or Stop.
- 3. Type the price or drag with the selector.
- 4. (Optional) Set an expiry date.
- 5. Choose your order size (the number of lots) by typing or dragging the slider from left to right. The pip cost and estimated margin usage will automatically be calculated below along with your available margin.
- 6. (Optional) Tap Take profit at and Stop loss at to set take profit and stop loss levels.
- 7. Click Confirm

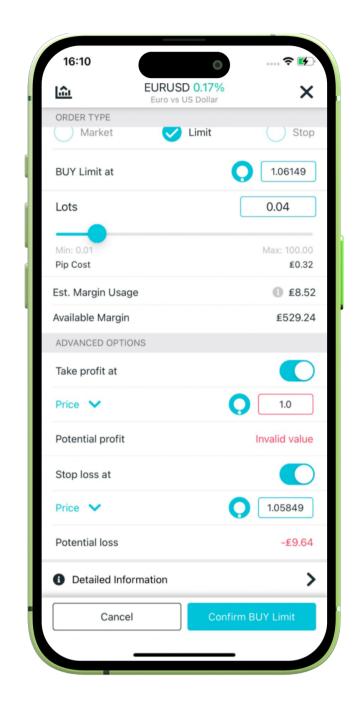

#### 6.2 Setting Risk Management Orders

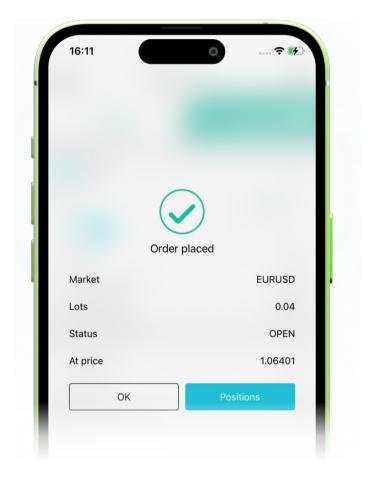

Take profit and Stop loss orders automatically closes your position at your specified price, securing your profit or minimising your losses.

It's recommended that you set TP/SL orders every time. Make sure to check the values. If it's underlined in red, that means your values are incorrect and you won't be able to submit your order.

#### 6.3 Place Order

Once you click Submit, a confirmation window will appear. You can tap OK to return to the charts or tap Positions to see all your open positions.

# 6.4 Positions

The Positions tab allows you to view your Orders, Open and Closed positions.

Tap this icon to toggle between Compact and Detailed views.

## 6.5 Orders

You can tap on an order to open a pop-up menu where you can:

- Check order details
- View the instrument's chart
- Modify the order
- Cancel the order by tapping X
- How many pips are left until the limit price is also shown for each pending order

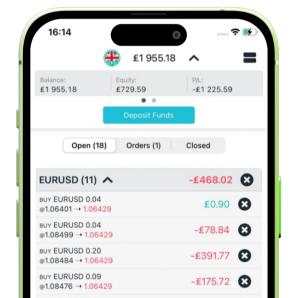

# 6.6 Open positions

The Open positions tab shows you:

- Open and current price
- Current Profit or Loss
- TP/SL levels if set

Tap on an open position to open a pop-up menu where you can:

- Open the chart of the instrument
- Modify the position add or change TP/SL levels
- Close part of the position
- Close the position
- See more detailed information about the position

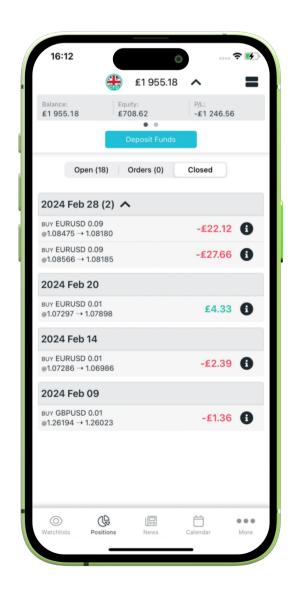

# 6.7 Closed positions

The Closed positions tab shows your closed trades sorted by date along with:

- Opening price
- Closing price
- Profit or Loss

Get more detailed information on a closed trade by tapping the **i** button.
